- POSTMAN

PROFILE

Full Stack Web Developer experienced in creating engaging user interfaces with HTML, CSS, JavaScript, and React, and proficient in backend development using Node.js, Express, and MongoDB. Skilled in delivering innovative and scalable web solutions.

PROJECTS

PERSONAL PORTFOLIO PROJECT

 [Shoeb-Tech-Arena.io](#)

- Built a personal portfolio website using React.js and hosted it on Netlify.
- Developed the website with HTML, CSS, JavaScript, and various UI frameworks, including Tailwind-CSS, Bootstrap, Material-UI, Carbon-UI, and ANT DESIGN.

SHOPPING BAG

 [Go To Project](#)

- Developed a full-stack e-commerce application using ReactJS, Firebase, and Algolia, enabling users to register and login with Firebase Authentication, search for products using Algolia search, and add items to the shopping cart for checkout and payment integration with Google Pay. Implemented sorting and filtering features to enhance user experience and utilized React-Bootstrap for responsive UI design.
- Designed and implemented a seller dashboard with statistical insights using Firebase Firestore Database, providing sellers with real-time sales analytics and the ability to add new products for review. Integrated the Fakestore API to fetch initial product data and utilized React-Bootstrap and CSS for styling and UI components.

CINEMA ELK

 [Go To Project](#)

- Built a fully functional web application with React, CSS, Material-UI, multiple APIs, Firebase authentication, and Firestore database for user reviews.
- Demonstrated proficiency in user authentication, dynamic content, and CRUD functionality with features like browsing movie categories, detailed information display, and review management with editing and deletion capabilities.

MOVIE WORLD

 [Go To Project](#)

- Built Movie World, a React-based web app with CSS and React-Bootstrap for a seamless movie booking experience.
- Utilized GeoFy API for nearby theaters and dynamic content, and secure payment options.
- Implemented easy seat selection, time slots, and a stunning UI design for an exceptional user experience.

INSTABUY!

 [Go To Project](#)

- Created InstaBuy, an elegantly designed E-commerce web application using CSS, React.js, and React-Bootstrap, offering secure authentication, product selection, and cart functionality.
- Leveraged APIs for product selection and recommendations, along with browser local storage, to provide a seamless and convenient shopping experience, showcasing proficiency in React.js and React-Bootstrap for personalized product recommendations.
